

Spare part: Feuerdesign fan
incl. cable and battery
for all models

article N°: 2009426

net weight: 0.113 kg

Original spare part Feuerdesign fan, battery and micro USB cable

The 3-stage, battery-powered fan motor supplies the charcoal with fresh air and allows a nearly smoke-free lighting of the grill. At the same time, it serves as a temperature controller during grilling. The battery is sufficient for an operation of about 4 hours. The state of charging is indicated by an integrated LED display on the fan module.
