Spare part: Feuerdesign carbon basket complete

fits Teide and Santorin models

article N°: 2007853

EAN N°: 4260429920280

net weight: 0.310 kg

Original spare part with cover, without ignition plate - for models Teide or Santorin

The robust and extra-wide charcoal basket is closed with a separate lid, preventing fat dripping in the charcoal basket

Stainless-steel sieve allows the heat to escape, but retains the charcoal completely in the container

Holds coal for about 40 - 60 minutes Grill time, depending on the type of coal (beech charcoal recommended)

Due to the strong heat, the basket naturally wears out slowly thus is not subject to warranty

The basket is a wearing part, therefore has to be replaced from time to time

Important: The carbon basket must never come into contact with water.

After use, allow the hot embers to cool down and then tap out the charcoal basket and store in a dry place.
